

Robots and flexible manufacturing systems (colleges and universities teaching materials)

Filesize: 4.09 MB

Reviews

This published publication is fantastic. it had been writtern very perfectly and useful. Once you begin to read the book, it is extremely difficult to leave it before concluding.

(Junius Herman)

ROBOTS AND FLEXIBLE MANUFACTURING SYSTEMS (COLLEGES AND UNIVERSITIES TEACHING MATERIALS)

paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 194 Publisher: Chemical Industry Pub. Date :2007-09-01 version 1. Book series. parallel robots and flexible manufacturing based on the content of two parts. from the basic theory. basic analysis methods to carry out lectures start layman's language . focuses on the robot and the basic working principle of flexible manufacturing and applications in engineering practice. Part of the contents of the book introduces the robot a robot research institutions used the mathematical basis of science. a single open chain robot driving source. commonly used sensors. Section introduces the flexible manufacturing flexible manufacturing technology and its set of faces works. plus flexible manufacturing systems. industrial robots in flexible manufacturing in the applications. Book for high school students in engineering colleges as required reading or optional materials are also available for professional teachers. graduate students and engineering technicians use and reference. Contents: Chapter 1 Introduction Section I of industrial robots and flexible manufacturing systems classification and performance of industrial robots Section Introduction to think about mathematical problems Chapter manipulator base coordinate projection II Section III influence coefficient matrix of coordinate transformation thinking questions Chapter tandem single open-chain robot manipulators Section structural analysis of Section II single open-chain serial robot kinematics of open-chain series III single-robot work space and singular institution position analysis of Section IV single open-chain series robot body trajectory planning of robot dynamics Introduction Section V Chapter parallel thinking questions section parallel robot robotic applications in parallel machines and Research Section Structural analysis of human institutions Section parallel robot kinematics problem of thinking Chapter industrial robots used parts classification and requirements of Section II Vice Section screw ball screw guides fourth harmonic Chapter VI gear reducer thinking questions...
